

COS10005 - Web Development

Lab 1 – Introduction and Getting Started

Objectives

By the end of this lab, you will:

- Have a solid understanding of the course structure
- Understand the structure of a basic web page
- Create your first HTML file using Visual Studio Code
- Apply CSS to style the page
- Open and test web pages in a browser
- Use browser developer tools to inspect and debug your page

Lab Tasks

Section 1: Icebreaker (20 minutes)

Each student will take 1–2 minutes to introduce themselves. This could include their name, background or major, personal interests, skills, and what they hope to gain from this workshop.

Section 2: Introduction to the Unit (15 minutes)

Your tutor will briefly introduce the unit structure, assessments, and grading criteria. Key points to highlight include weekly lab activities, assignment milestones, and the requirement to score at least 50% overall to pass the unit.

Section 3: Recall the Concepts We Learned in Week 1 (15 minutes)

- What is the Internet?
- What is the World Wide Web?
- Languages of the Web
- Client vs Server

Section 4: Hands-on Practice (60 minutes) (10 marks)

It's totally fine if you don't fully understand what you're doing at this stage. This session is just to give you a taste of the process of building a website — writing code, saving files, opening them

in a browser, and seeing something come to life. You'll learn and understand more as we go through the unit. The key is to get hands-on and experiment!

Task 1: Setup (2 marks)

1. Follow the guide, install Visual Studio Code (VS Code) from <https://code.visualstudio.com/download>
2. Create a folder on your desktop named: **lab01**

Task 2: Create Your First Web Page (2 marks)

1. Open VS Code and create a new file.
2. Type the following HTML:

```
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <title>My First Web Page</title>
6      <!--Task 3 placed here-->
7  </head>
8  <body>
9      <h1>Welcome to <!-- Replace With Your First Name -->'s Web Page</h1>
10     <p>This is my first HTML page for COS10005, created by <!-- Replace With Your Name -->.</p>
11     <!--Task 4 placed here-->
12 </body>
13 </html>
```

3. Save the file as index.html inside the lab01 folder.
4. Open the file in your browser by double-clicking it.

Task 3: Add CSS Styles (2 marks)

1. In VS Code, create a new file named style.css.
2. Type the following CSS:

```

1  body {
2      background-color: #f0f8ff;
3      font-family: Arial, sans-serif;
4      color: #333;
5  }
6
7  h1 {
8      color: #0073e6;
9  }
10

```

3. Link this CSS file in index.html by replacing <!--Task 3 placed here--> inside the <head> section:

<link rel="stylesheet" href="style.css">

4. Save and refresh the browser.

Task 4: Add More Elements (2 marks)

1. Add the following HTML into the <body> section by replacing <!--Task 4 placed here-->

```

11  <h2>About Me</h2>
12  <ul>
13      <li><!--One skill you want to learn in this unit--></li>
14      <li><!--One thing you are curious about on the web--></li>
15      <li><!--One personal interest (non-academic)--></li>
16  </ul>
17
18  <h2>Contact</h2>
19  <p>Email: <!--Replacing Your Student ID here-->@student.swin.edu.au</p>
20
21  <h2>Useful Link</h2>
22  <p>Visit <a href="https://www.swinburne.edu.au">Swinburne University</a></p>
23  <!--Add another useful link of your choice related to Your Course/Your Learning Resources/News/or any-->

```

2. Replacing the comments inside and next to email: by your answer.
3. Add another useful link related to your choice.

Task 5: Use Browser Developer Tools (2 marks)

1. Right-click the page in the browser and choose 'Inspect'.
2. Try editing text or CSS styles in the **Elements** or **Styles** panels at your choice.

Reflection and Closing (10 minutes)

Allow students to share what they learned, found interesting, or had difficulty understanding.
